

Michael Pons

Curriculum Vitae

(31 years old) – ✉ ponsm@gfz-potsdam.de

ABOUT ME

I am a geodynamicist specializing in numerical modelling to explore complex geodynamic and tectonic processes, from regional deformation to global mantle-lithosphere interactions. My research combines computational simulations with geological and geophysical data to address fundamental questions about Earth's dynamic evolution.

Please visit my personal website https://minerallo.github.io/website_MP/ for more details.

EDUCATION

2018 – 2022	PhD in Geophysics – (University of Potsdam - Germany)
2016 – 2017	Master 2/Postgraduate – Geodynamics - (University Rennes 1 - France)
2015 – 2016	Master 2/Postgraduate – Tectonics - Erasmus - (University Roma 3 - Italia)
2014 – 2015	Master 1/Graduate - Geodynamics - (University Orléans- France)
2013 – 2014	Licence /degree – Geology - Erasmus - (University College Cork - Ireland)
2011 – 2013	Licence /degree – Geology - (University Lille 1 - France)
2010 - 2011	Bacalaureat Scientific option Science of the Life and the Earth. - (France – Cannes)

PROFESSIONAL EXPERIENCE

Postdoctoral Researcher, GFZ, Germany

Jun 2022 - Present

Advisors: Prof. Stephan Sobolev (stephan.sobolev@gfz.de), Prof. Sascha Brune (sascha.brune@gfz.de)

- Built global-scale numerical models to investigate plate tectonics using the geodynamic code ASPECT
- Developed new features for ASPECT, including custom meshing and postprocessing modules for spherical geometries
- Integrated GPlately with the Geodynamic World Builder to define complex initial conditions for geodynamic simulations

PhD Researcher Universität Potsdam and GFZ, Germany

2018 – 2022

Advisors: Prof. Stephan Sobolev (stephan.sobolev@gfz.de), Prof. Frank Krüger (kruegerf@geo.uni-potsdam.de)

PhD thesis : “[The nature of tectonic shortening in the Central Andes](#)”

- Modeled Andean subduction dynamics with ASPECT to explore shortening variability
- Designed and implemented new postprocessing modules to track crustal shortening within the numerical models
- Developed a data-driven geodynamic model of the Pampean flat slab subduction to assess how slab geometry influences strain localization and foreland tectonic styles

MSc Researcher Université de Rennes I, France

2017

Advisors: Prof. Philippe Steer (philippe.steer@univ-rennes1.fr), Prof. Maxime Mouyen (maximemouyen@gmail.com), Prof. Laurent Longuevergne

MSc Thesis: *Earthquakes' impact on GRACE gravimetric signal at global scale*

- Developed a Matlab-based program to calculate coseismic displacements at the global scale
- Processed and filtered Level-2 GRACE data to isolate coseismic signals for comparison with numerical models

MSc Researcher Università Roma Tre, Italy

2016

Advisors: Prof. Claudio Faccenna (claudio.faccenna@uniroma3.it), Dr. Andrea Sembroni

MSc Thesis: *Topographic study of the Deccan region using geological and modeling approaches*

- Reconstructed pre-Deccan Traps topography ~65Ma ago
- Quantified isostatic flexural and dynamic topography to assess tectonic and mantle contributions

Research Intern Université d'Orléans, France

2015

Advisors: Prof. Yan Chen (yan.chen@univ-orleans.fr), Dr. Hongsheng Liu

Project: *Paleomagnetic study of the Qilitanling granitic massif (South China)*

- Applied AMS and paleomagnetic analyses (thermal demagnetization, Day plots) to the Qitianling pluton to investigate

its emplacement style

- Used paleomagnetic reconstructions using Paleomac to estimate the size of the Mongol-Okhotsk Ocean in the Late Jurassic

Research Intern *University College Cork, Ireland*

2014

Advisors: *Prof. Patrick. Meere* (p.meere@ucc.ie)

Project: *Finite strain analysis of conglomerates from the Dingle Peninsula*

- Quantified and mapped rock deformation using finite strain analysis techniques
- Analyzed conglomerates with varying grain sizes and distributions to assess strain patterns

TECHNICAL SKILLS

Programming languages :	MATLAB, C++, Python
Development tools :	Linux, git, bash scripting, High Performance Computing (SLURM)
Numerical Modelling :	ASPECT, GWB (worldbuilder), Gplates
Other software :	Paraview, GIS, Anisoft, Adobe illustrator

GRANT AND AWARDS

- Outstanding Student Poster, Ada Lovelace geodynamics Workshop, Hungary, Hévíz, 2022.
- Outstanding Student and PhD candidate Presentation (OSPP), EGU General Assembly 2022.
- Erasmus + traineeship grant, Roma Tre, 2016.
- Erasmus traineeship grant, Cork, 2014.

COMPUTATIONAL RESOURCES GRANTS

- HPC time on NHR@ZIB cluster, Germany
Project: Modelling support for monitoring Earth evolution through time (MSMEET) - [bbk00014](#)
Role: Co-investigator | Allocation: ~17 to 19 million CPU hours | 2024 - 2025 | ~€2 millions
- HPC time on NHR@ZIB cluster, Germany
Project: Plate boundary dynamics: Geodynamic modeling of the crust, lithosphere, and mantle – [bbp00039](#)
Role: Co-investigator | Allocation: ~10 to 19 million CPU hours | 2020 - 2024 | ~€2.9 millions
- HPC time on NHR@ZIB cluster, Germany
Project: Lower mantle dynamics: Modelling shear wave seismic anisotropy – [bbk00018](#)
Role: Co-investigator | Allocation: ~19 million CPU hours | 2024 - 2025 | ~€2 millions

TEACHING AND MENTORING

Teaching courses

- **Instructor**, *Online Summer School for Biogeodynamics*, “Tectonics numerical modelling” (2025)
- **Teaching Assistant**, *University of Potsdam (MSc level)*
 - Advanced Geodynamics: Practicals on numerical modeling (2025)
 - Neotectonics & Geodynamics: Sessions on deglaciation, dynamic topography, flexural isostasy, and fault reactivation (2023)

Mentoring for numerical modelling

I mentor researchers from PhD- to professor-level in numerical modelling, with a focus on using ASPECT for geodynamic simulations.

- Chaowei Lu, Melt weakening (2025 – present, with Xiaoping Yuan)
- Dr. Matias Barrionuevo, Andean deformation (2022)
- Dr. Miao Dong, plate tectonics and plumes dynamics (2024- present)

- Dr. Alexander Koptev, plume-rift interaction (2022 - present)
- Dr. Alessio Lavecchia, plumes-lithosphere delamination (2023 - present)
- Prof. Guido Gianni, subduction and lithosphere deformation (2023 - present)
- Tina Neumann, rift dynamics (2025 – present, with Sascha Brune)
- Guy Fisch, subduction dynamics (2024 – present, with Roi Granot and Sascha Brune)
- Madhusudan Sharma, subduction dynamics (2025 – present, with Ivone Jiménez Munt)
- Ying-ying Li, plume-subduction interaction (2024 – present, with Sascha Brune and Bernhard Steinberger)

SERVICES TO THE SCIENTIFIC COMMUNITY

Peer-reviews for scientific journals (2023-Present)

Geochemistry, Geophysics, Geosystems; Tectonics; Earth and Planetary Science Letters; Journal of Geophysical Research – Solid Earth

Session organization and chairing at GeoMOD 2025

Session “Tectonics and crustal deformation processes”

Session organization and chairing at EGU Gen. Assembly 2025

Session “Subduction Zone Dynamics: Global Perspectives with a focus on the western margin of South America”

Student poster/PICO award judge at EGU Gen. Assembly 2023-2025

Reviewed and provided feedback to graduate and undergraduate student talk and poster presentations

OUTREACH

Chief co-editor [EGU Geodynamics blog](#)

2022 - present

European Geoscience Union

- Manage team of 20 editors, columnists and illustrators, media managers
- Edit and write weekly blog posts related to Geodynamics and Academia
- Report the blog activity at EGU general assembly (>60k unique views/yr, over more than 120 countries)
- Written and edited over 20 blog posts since 2020. Here is a selection:

[The Nature of the Shortening in the Central Andes: Part 1](#) – Michael Pons (2023)

[Geodynamic Data-Driven Modelling: Bridging the Gap Between Observations and Numerical Models](#) - Constanza Rodriguez Picada (2023)

[A Journey to the Centre of Plate Tectonics and Mantle Convection](#) - João Duarte (2023)

[Modelling Magma Propagation in Three Dimensions](#) - Lorenzo Mantiloni (2023)

[How Has the Gibraltar Slab Influenced the Alboran Domain Deformation?](#) - Pedro J. Gea (2023)

[Reflections on the Geological and Geodynamic Evolution of the Southern Central Andes](#) - Matías Barrionuevo (2023)

[Why Do Seismic Images Vary Beneath Different Ocean Floors?](#) - Elodie Kendall (2022)

[How to Find Your Next Job in Earth Sciences?](#) - Michael Pons (2022)

[Rendering Tools for Geodynamics and Surface Modeling](#) - Michael Pons (2022)

Outreach representative for [EUROBIG](#)

2025 - present

European COST Action (Pan-EUROpean BioGeodynamics network)

- Developed, maintained and updated the EUROBIG website with project news and resources
- Developed outreach content to promote biogeodynamics research across disciplines
- Coordinated dissemination of activities and outcomes via web and social media channels

Science Communication & Visualization

2023

Berlin planetarium

- Created scientifically accurate visualizations of Earth's interior dynamics for public outreach and educational displays
